

Saak

HOOOLIGAN

Grade Levels K-2

A series of elementary level thematic units featuring Tlingit language, culture and history were developed in Juneau, Alaska in 2004-6. The project was funded by two grants from the U.S. Department of Education, awarded to the Sealaska Heritage Institute (Boosting Academic Achievement: Tlingit Language Immersion Program, grant #92-0081844) and the Juneau School District (Building on Excellence, grant #S356AD30001).

Lessons and units were written by a team of teachers and specialists led by Nancy Douglas, Elementary Cultural Curriculum Coordinator, Juneau School District. The team included Juneau teachers Kitty Eddy, Shgen George, Kathy Nielson, Hans Chester and Rocky Eddy, and SHI language team members Linda Belarde, Yarrow Vaara, David Katzeek, John Marks, Mary Foletti, Rose Natkong and Jessica Chester. Curriculum consultants Julie Folta and Toni Mallott assisted and Annie Calkins edited the lessons and units.

Lessons were field tested in Juneau classrooms in 2005-6.

All units are available online at sealaskaheritage.org.

Moon Phases Activity

1. 6 x 8 Blue construction paper
2. Fold in half
3. Cut a circle in the center of the bottom half
4. Cut a white circle the same size and glue it on the blue paper – under the hole you cut out is step 3.
5. Glue 1.5” circle to a popsicle stick

New Moon

The lighted side of the Moon faces away from Earth. This means the Sun, Earth, and Moon are almost in line, with the Moon in between the Sun and Earth. The Moon looks very dark.

First Quarter Moon

The right half of the Moon looks lighted and the left side looks dark. During the time between the New Moon and the First Quarter Moon, the area of the Moon that looks lighter gets larger and larger every day until we have the Full Moon.

Full Moon

The lighted side of the Moon faces Earth. The Earth, Sun, and Moon are nearly in a straight line, with the Earth being in the middle. The Moon is very bright from the sunlight reflecting off of it.

Second Quarter Moon

The left half of the Moon looks lighted and the right side looks dark. During the time between the Full Moon and the Last Quarter Moon, the area of the Moon that looks lighter gets smaller and smaller every day until the New Moon. This Moon Phase is often called the Third Quarter.
